CHRIS NORTON, DDS...Dr. Norton got his Bachelors degree in Chemistry from S.M.U. and his D.D.S. degree from Baylor in Dallas. He was in private practice from graduation to 1996 when he became the Director of Dental Programs at Amarillo College. He then joined a group practice in 2001 where he was the top producer for the largest orthodontic provider in Utah. He came back to Texas in 2007 and established his current practice the Fast Trax Orthodontics in McKinney, Texas. He is a member of many professional organizations including the American Dental Association, Texas Dental Association, and the Academy of General Dentistry.

“How to Grow Attractive Faces” – (Friday, Feb. 5th – 9:00- 12:00 - 3 CEUs) Thought you were genetically determined to have the exact face you display today? This evidence-based presentation will challenge your concept of predetermined beauty. What is beauty? Is it important? What can be done to maximize the attractiveness of your face? The answers are issues that can be built into any dental practice. Give your patients the information and therapy they need to have their children grow into the most attractive faces genetically possible. Aside from beauty there are many other health benefits for the patient with this information.

“Who Can Treat Sleep Apnea: You Can!” (Friday, Feb. 5th - 1:00-4:00 – 3 CEUs) What is sleep? Sleep Apnea is pathological sleep. What are the repercussions of sleep apnea? Sleep apnea victims are three times more likely to have a heart attack than smokers. The dental office should be part of the team to offer preventive therapy to reduce the likelihood of sleep apnea. In addition, dental devices are the first line therapy recommended for patients with mild to moderate sleep apnea. Twelve million Americans suffer from sleep apnea (1 in 22). Learn how to screen your patients for sleep apnea and Upper Airway Resistance Syndrome. The basics for starting sleep apnea treatment in your office will be addressed. Learn how to prevent your patients from falling into the sleep apnea risk pool. This evidence-based scientific presentation will challenge several areas of current dental therapy and explain many patient symptoms of which the dental team should be aware.
