Hilton Garden Inn at La Cantera
5730 Rim Pass, San Antonio, Texas, 78257
210-696-3500
Tricia Osuna, RDH, BSDH, FAADH (Friday, January 20, 2017  6 CEUs)... Tricia Osuna is a University of Southern California graduate, Past President and Fellow of the American Academy of Dental Hygiene and Past President of the California Dental Hygienists’ Association. Tricia has over 38 years of experience as a dental hygienist to share with her audiences in a humorous and enlightening presentation experience. She is an enthusiastic lifelong CDHA and ADHA member and a previous Member of the Dental Board of California. She is a Founding Member of the American Board of Facial Esthetics. Recognized for her many efforts and contributions to the Dental Hygiene profession, Tricia has received several awards including the CDHA’s President’s Recognition Award, the ADHA Bausch and Lomb “Distinctions in Dental Hygiene” Award and most recently the 2015 American Dental Hygienists’ Association Distinguished Service Award. Licensed in both California and New York, her experiences traverse the dental hygiene arena in a very unique way spanning a variety of roles including Consultant, Clinician, Educator, International Presenter, Author, Mentor as well as business owner.

A Little of This and a Little of That!: Today’s dental products and treatment options (Friday, 9:00 – 12:00) Today’s dental sessions require an exhaustive knowledge of products, instruments and equipment. Our profession has changed and grown to a new level which offers us continuous challenges to recognize the new advances in technology and their use in dentistry. As professionals providing health services, we should be at the pulse of clinical devices and treatment, while being able to recommend product protocols for use in the office. The process of care (assessment, diagnosis, treatment planning, implementation and evaluation) requires us to understand what these products are, how to use them, contemporary treatment options, how to implement the procedures and evaluate what is and what is not working for us as individuals and as clinicians. We will also discuss ergonomic options to protect ourselves as clinicians.

This course will provide information for the clinicians to be able to:
- Recognize improvements on products utilized by dental professionals
- Distinguish which new-to-market products should be brought into your practice
- Select materials and products for dental hygiene therapy, oral cancer screening, patient communication and instrumentation
- Discuss diagnosis assistance with employers and rationale for changes in assessment forms and diagnostic tools
- Communicate effectively to patients and assist in the business of the dental practice
- Recognize and evaluate changes to implement in the office
- Discuss strategies that incorporate efficiency in patient treatment for a more productive schedule

It’s all about Saving Lives! Organ transplantation, donation and recipient care (Friday, 1:00 – 4:00) As dental professionals, as well as part of society, we are all able do something to help the thousands of individuals in need of our care. As a specific set of healthcare providers treating this unique group of transplant recipients we need to understand and discuss their options and oral hygiene needs. Organ transplantation and donation has increased tremendously over the last 10 years yet there is still an immense need for understanding the processes of donation, transplantation and recipient care.

Participate in a sharing of organ transplantation and donation information; learn about transplant recipients and their need for specialized dental care. This presentation will offer insight about the ‘how to’s’ of not only dental care for organ recipients but also communication with their families. We will also share insight on how to be a donor; understand that process and how to aid in sharing the message with your patients and colleagues on how to ~ Save Lives!

Sharing life’s experiences is a fabulous way to learn!

Course Objectives:
- Understand the process of transplantation
- Discuss patient’s dental needs based on medications and oral complications
- Recognize the need for specialized care for transplant recipients
- Appreciate and understand organ donation processes
- Communicate with patients and family to share the need for registration

Angie Stone, RDH, BS (Saturday, January 21, 2017...9:00-4:00) Angie Stone, RDH, BS began her career in the Navy as a dental assistant. She has taught in dental assisting and dental hygiene programs. She has also provided onsite education
to dental professionals in 44 states, the District of Columbia, and 6 countries and territories. In addition to numerous published articles, her original research regarding xylitol and elders was published in a peer reviewed medical journal in November of 2013. Angie’s Amazon Best Seller book, Dying from Dirty Teeth, was launched in March of 2015. She is the founder of the HyLife Oral Health Alliance. The mission of the alliance is to keep dependent elders free of dental disease for their life time. Angie is a six time attendee of CareerFusion and was awarded the Sunstar Award of Distinction in 2012 for her work with xylitol and the geriatric population.

**My Favorite Things...Dental Hygiene Style (Sat., 9:00 - 12:00 - 3 CEUs)** Angie has been called, “The Oprah of Dental Hygiene” while presenting this course! As Angie teaches how to make decisions on product choices, she mentions items that have made a positive impact on her life as a hygienist. Attendees receive samples of many of the things Angie speaks about. It is not unusual to hear hygienists squeal with delight and cheer during the presentation, much like the Oprah’s audience members used to do during her “Favorite Things” show! Come feel Angie’s passion for improving the lives of hygienists everywhere as she teaches how to make “HyDuctions” and shares the HyDuctions she has made throughout her career.

**Course Objectives:** After completing this program, the dental professional should be able to:

1. Recognize what dental professionals can do to assist their aging patients remain dentally healthy for their lifetime
2. List various things that can be done to assist the clinician to practice ergonomically
3. Understand new technologies available in dental hygiene instruments, interdental cleaning, prophy angles and hand pieces and other items
4. Identify the role fluoride and xylitol play in the reduction of tooth decay
5. Discuss opportunities that are available for hygienists outside of operatory walls

**The Disappearing Patient Population (Sat., 1:00-4:00 - 3 CEUs)** Angie is an expert on this topic and this is her signature course. Angie takes attendees on a journey as she shares her experiences with this population and teaches about what she is doing personally to save elders from “Dying From Dirty Teeth”. She addresses oral care issues facing dependent adults, with a focus on nursing home residents and their primary care givers, namely nursing assistants and nurses. This information will get attendees energized about this population and offer opportunities to help this population. Come feel the passion and excitement.
